The Development of Atmospheric General Circulation Models: Complexity, Synthesis, and Computation

Leo Donner
GFDL/NOAA, Princeton University

KT Book Project Update, Fort Collins, August 2009

Status

- 7 of 9 chapters submitted
- Reviews underway
- Interactions with authors, based on reviews, this fall
- Manuscript to Cambridge University Press, expected on schedule by end of year

Possible Reviews by CMMAP Graduate Students

- Valuable perspective provided by readers in early career
- Reviews should be ready by September to permit author consideration
- One review per chapter; authors already to receive three reviews
- If interested, contact leo.j.donner@noaa.gov
