## The Teal Housewives of Colorado: How Ducks Make the Most of Their Summer Break

The March Teen Science Cafe will feature Casey Setash from the Department of Fish, Wildlife, and Conservation Biology at Colorado State University.

How do ducks fly all the way to Colorado from South America and still find time to sit on eggs for a month? Why would they even bother coming up to the mountains when they could stay in the balmy tropics? And how do you even find a duck nest anyway? We'll find out all of this and more, delving into the world of the Cinnamon Teal and the ways it makes the most of its time in Colorado.

Food and drinks are provided. Please RSVP so we can plan accordingly.
