144 S. Mason Street | 5-7PM

Presentation begins at 5:30PM

Dr. Tiezheng Tong

A toolbox of membrane technologies: The magic that leads to water sustainability

February's Teen Science Cafe will feature Dr. Tiezheng Tong. Dr. Tong is an assistant professor in the Department of Environmental Engineering at Colorado State University

In this presentation, attendees will learn about the principles of different membrane technologies, which are used in homes and various industries. You will learn how those technologies are working and how they are turning different "dirty" waters (such as seawater, wastewater) into clean and often drinkable water.

Food and drinks are provided.
Please RSVP so we can plan accordingly.
