OCTOBER 11

Neandertals are us! Learn why some of us carry more Neandertal genes than others

Dr. Mica Glantz
Department of Anthropology
Colorado State University

October's Teen Science Cafe will feature Dr. Mica Glantz from CSU's Department of Anthropology.

During this presentation, attendees will identify the characteristics that separate modern humans from Neandertals from human fossil casts. Dr. Glantz will also present the evidence that suggests modern humans and Neandertals were romantically involved in the past.

Food and drinks are provided. Please RSVP so we can plan accordingly.
