

PhotoToWeb

by Stone Design

Creating Web Albums

Selecting Images

- * select an album style or leave as default
- * drag in a folder of images, selected images from anywhere or select images from iPhoto into the main album window of PhotoToWeb
- * many formats supported

Manipulate Images

- * resize & rotate
- * crop
- * preview
- * rename & reorder
- * add notes (story)
- * add/remove images

Web Options

- * basic layouts
- * image and album titles & where they appear
- * adding borders, modifying navigational bars
- * image quality (if space is an issue)
- * modify thumbnails for index
- * homepage links
