

An Introduction to NetCDF

Part 2 - NetCDF Operators (NCO)

FAPCRD - 28 Jan. 2011

Why NCO?

- A simple command line interface to slice, dice and otherwise manipulate netCDF files.
- http://nco.sourceforge.net/#prp_sei

Getting NCO?

- They admit not always easy to build.
- pre-built binaries:

Mac OS X/Darwin

Use the [DMG](#) files if you do not have MacPorts installed. You may need to add `/opt/local/bin` to your executable path to access the operators.

- [nco-4.0.3_x86_10.6.dmg](#) (34M): For Mac OS 10.6 (last updated Friday, 17-Sep-2010 22:15:57 UTC). Maintained by Chad Cantwell.
- [nco-4.0.3_x86_10.5.dmg](#) (34M): For Mac OS 10.5 (last updated Friday, 17-Sep-2010 22:16:29 UTC). Maintained by Chad Cantwell.
- [Fink](#) packages for [NCO](#): Currently NCO 3.9.5. Maintained by Alexander Hansen.
- [MacPorts](#) infrastructure for [NCO](#): [Portfile](#) for NCO 3.9.9. Maintained by Takeshi Enomoto.
