Indian monsoon skill vs. rainfall-SST phase offset

Model-Obs (0° - 20° N, 40° E- 100° E) May-Oct

- precipitation-SST phase offset is a poor predictor of monsoon skill

color	type	models

Indian monsoon skill vs. rainfall-SST phase offset

Model-Obs (0° - 20° N, 40° E- 100° E) May-Oct

- precipitation-SST phase offset is a poor predictor of monsoon skill
- is precipitation-SST phase angle linked to sensitivity of convection to tropospheric moisture?

further musings on the great red spot...

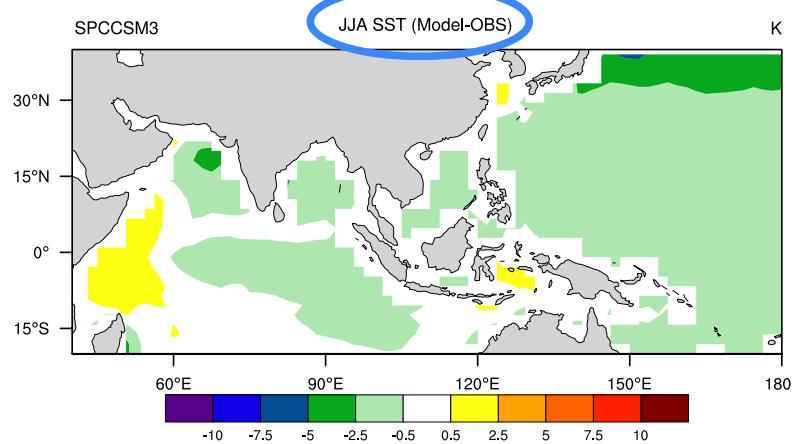

AMIP

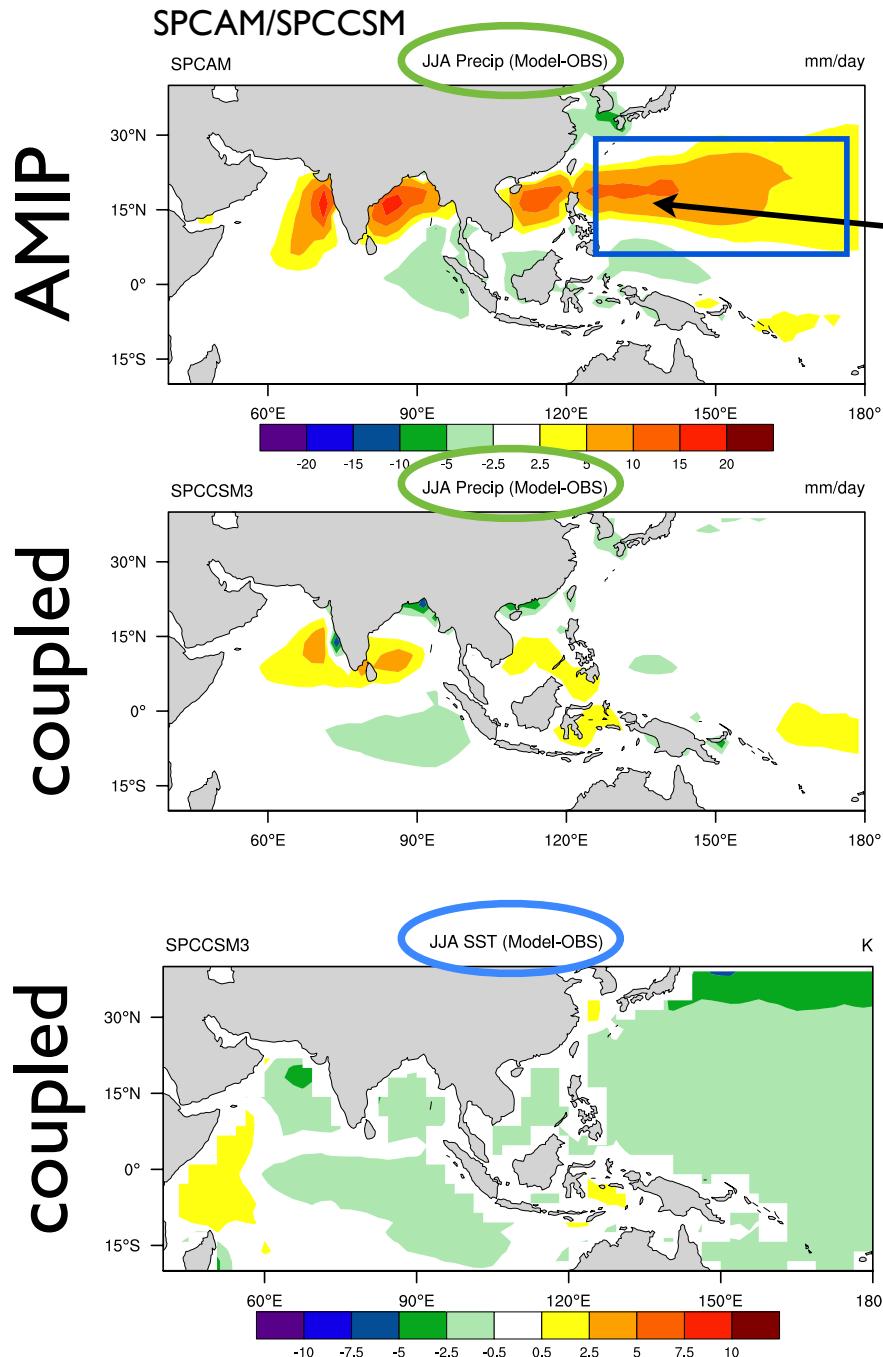

coupled

coupled

Does the GRS go away
because cloud and rain
cool the ocean surface?

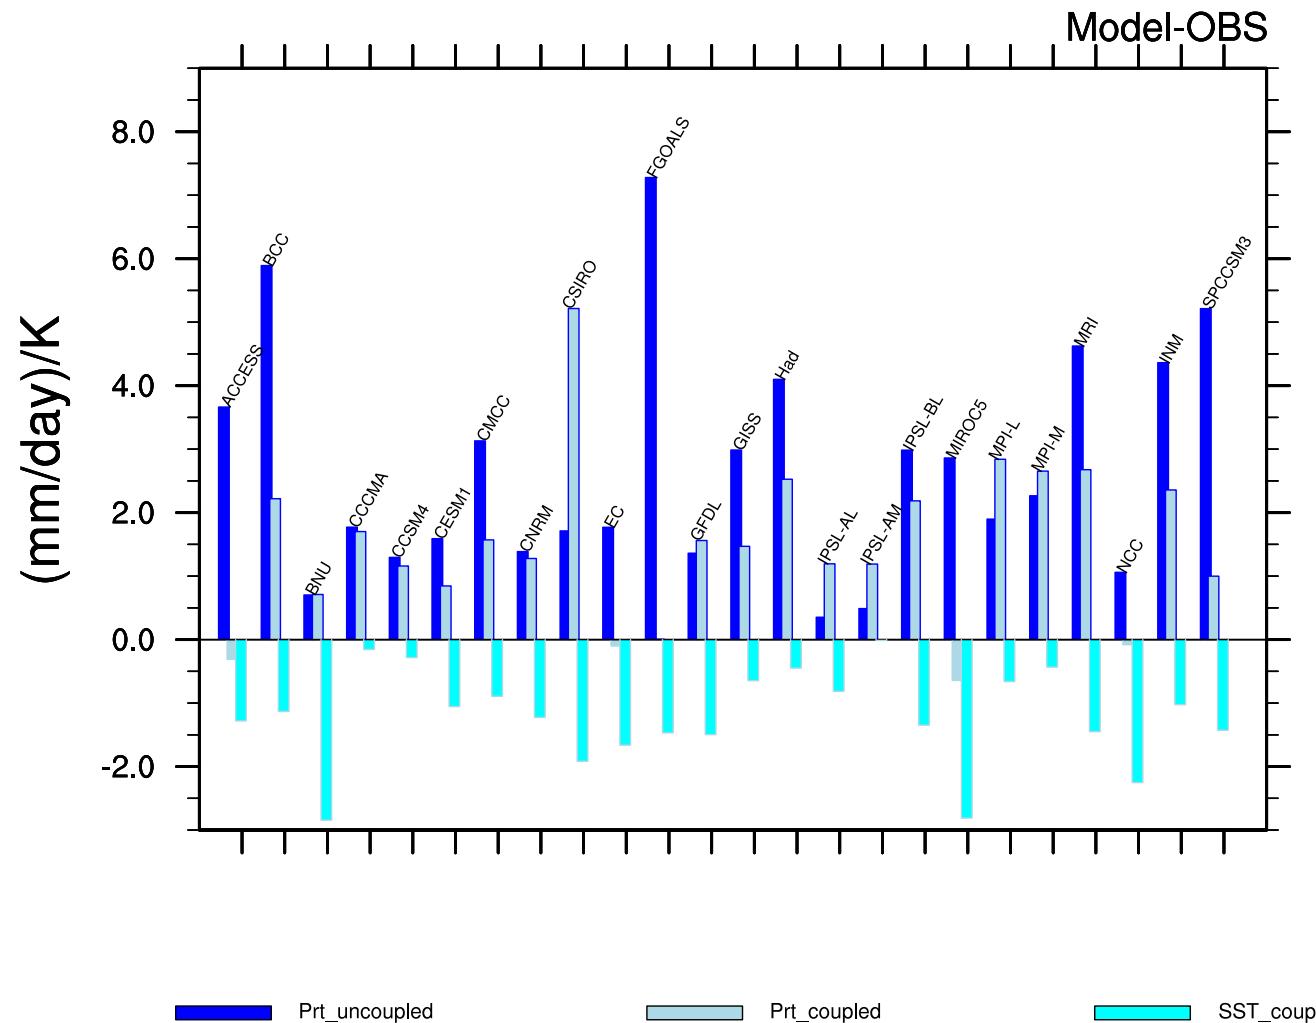

GRS

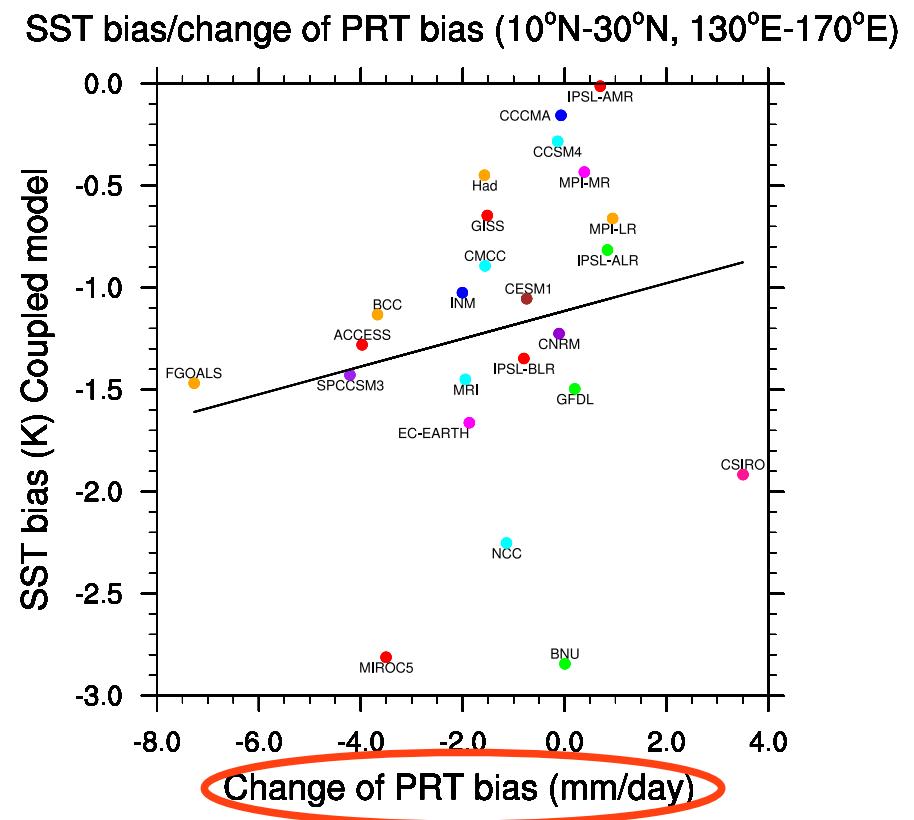

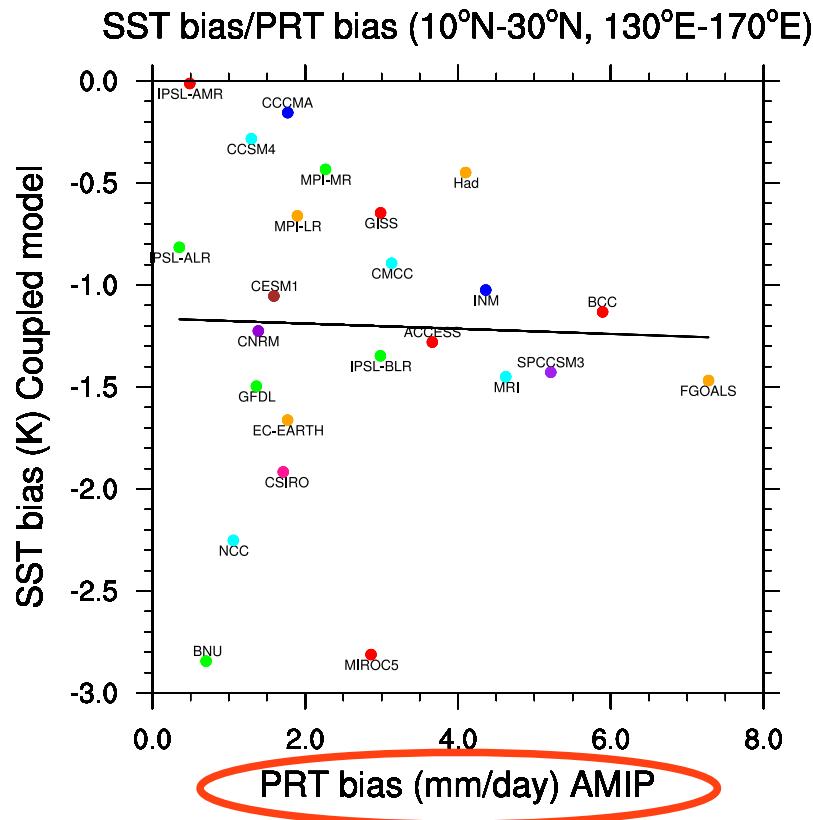

Does the GRS go away
because cloud and rain
cool the ocean surface?

CMIP5 vs AMIP5 simulations

JJA Precip/SST (10°N - 30°N , 130°E - 170°E)

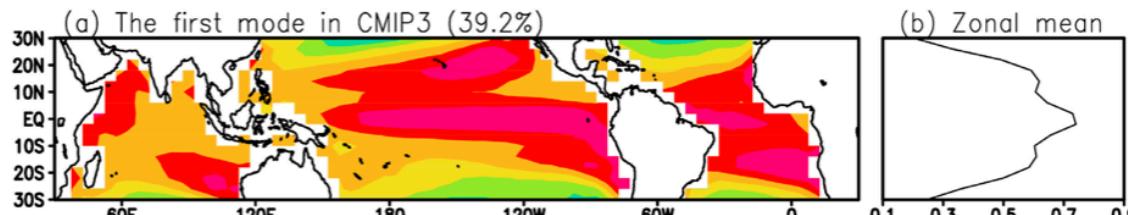

CMIP5 vs AMIP5

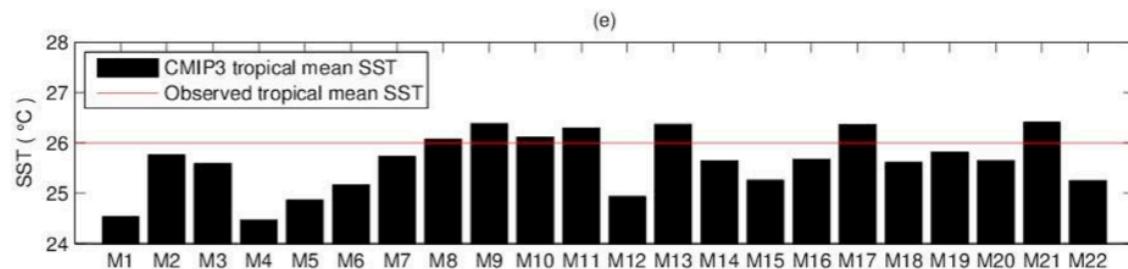

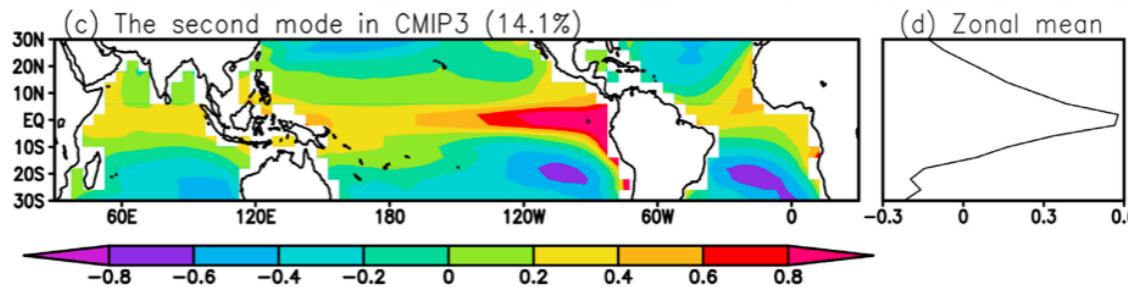

trends are small. spread is large.
SST decreases may have multiple causes.

what causes SST biases in coupled models?

cloudiness effect

ocean model effect

GEOPHYSICAL RESEARCH LETTERS, VOL. 39, L22703, doi:10.1029/2012GL053777, 2012

Origins of tropical-wide SST biases in CMIP multi-model ensembles

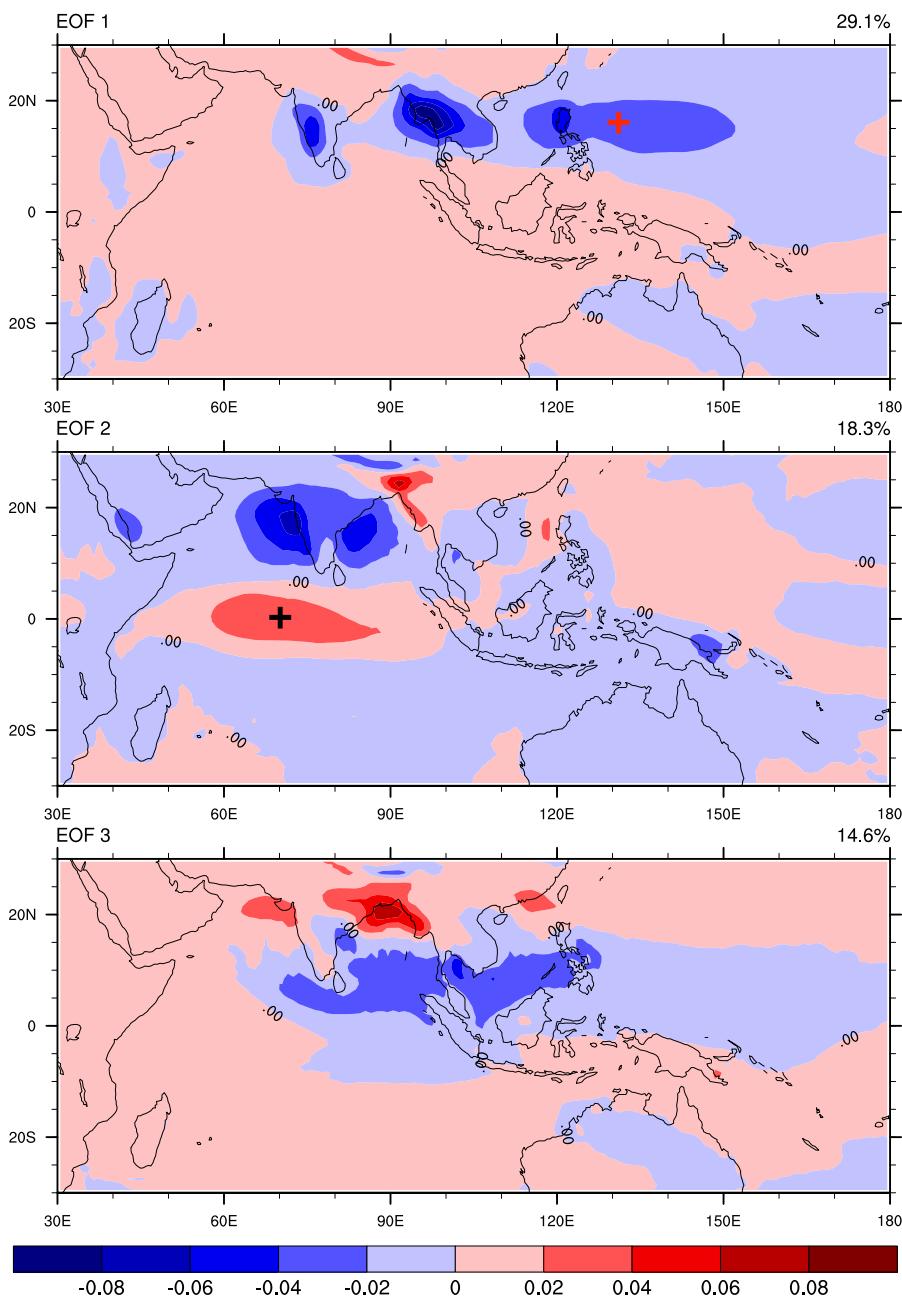

Gen Li^{1,2,3} and Shang-Ping Xie^{2,3,4}

Received 3 September 2012; revised 20 October 2012; accepted 23 October 2012; published 29 November 2012.

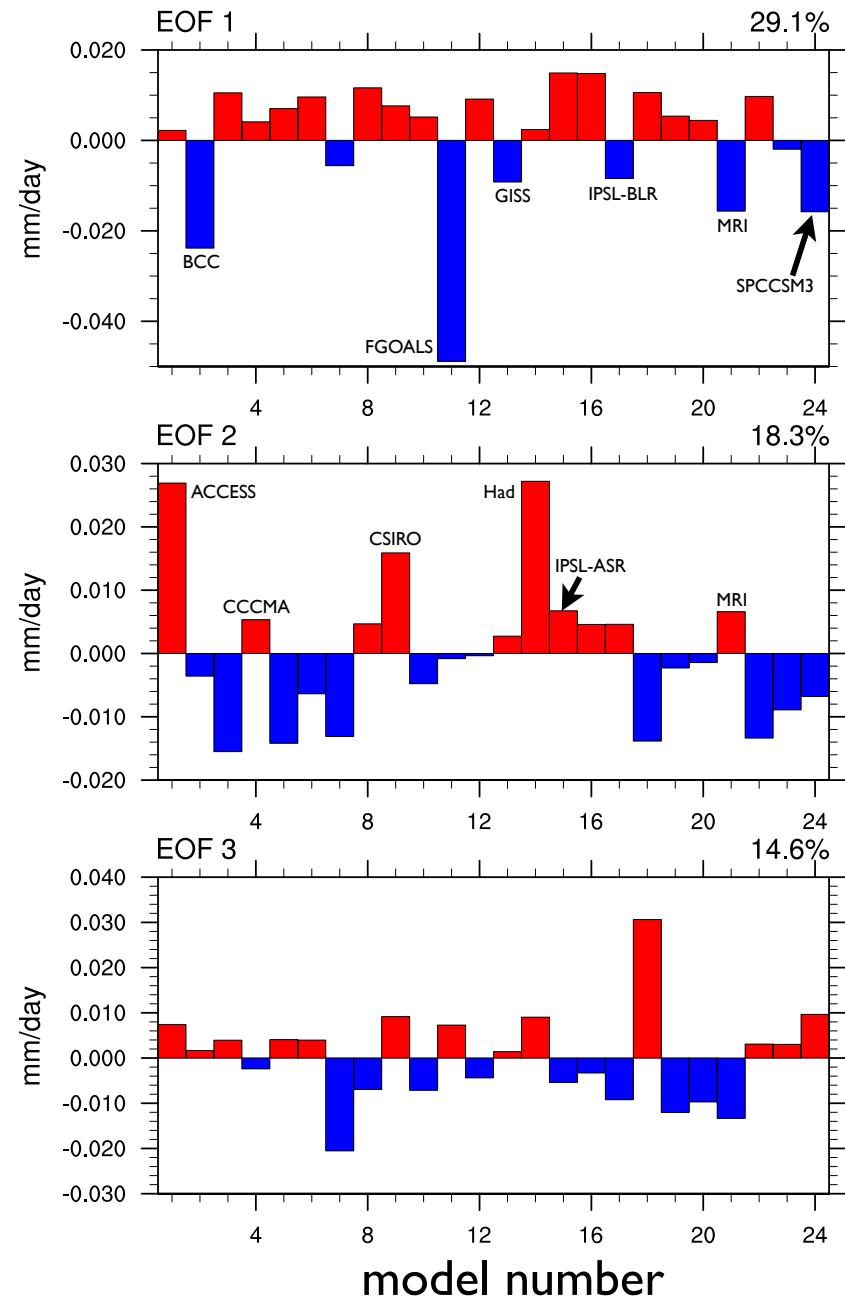

what causes GRS biases in AMIP models?

use the same approach as Li and Xie

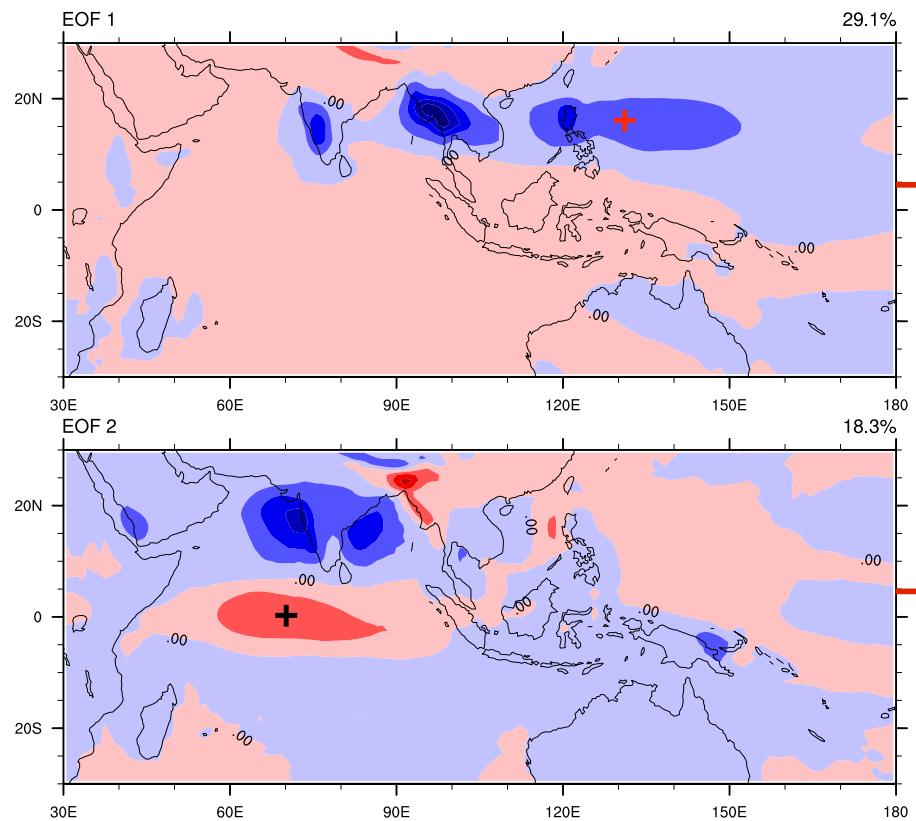

Precipi bias: JJA: AMIP models

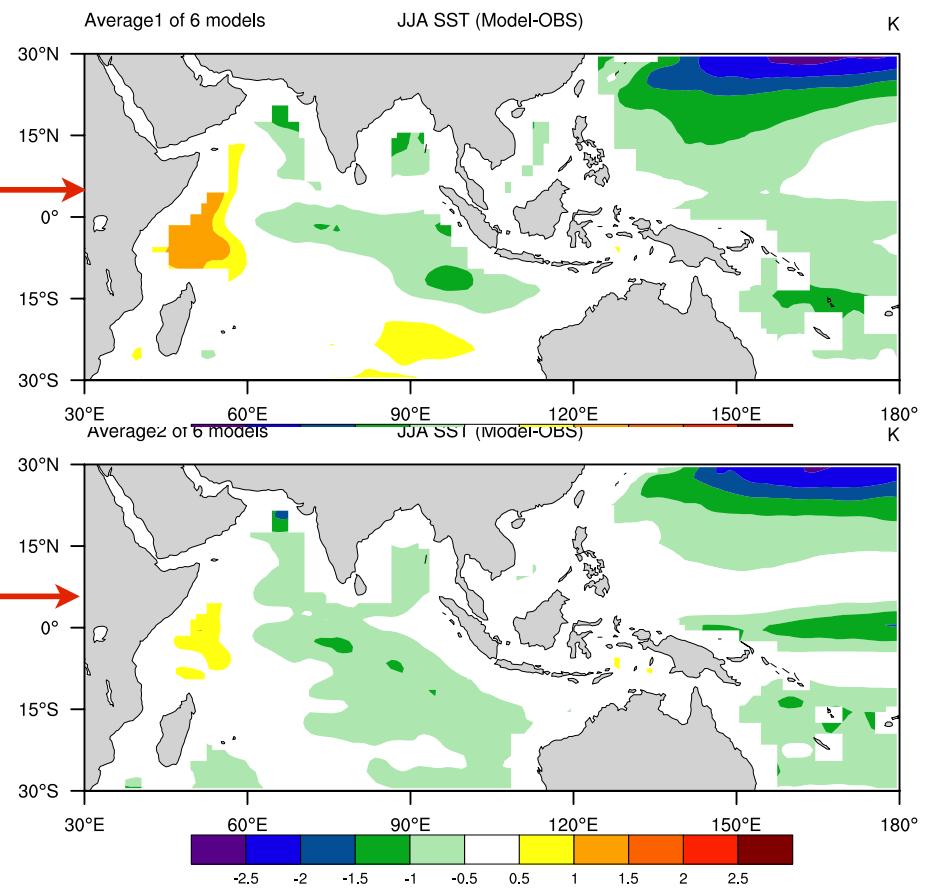

Precip bias: JJA: AMIP models

Precipi bias: JJA: AMIP models

SST bias: JJA: CMIP models

ensuing coupled SST biases are not highly correlated with AMIP precipitation biases.
