

# K-12, Public, & Policymakers

- Many strong pieces (LSOP, UCAR, School Districts), but some **connections** are weak
- Need for a **database** of education/outreach resources that all can use, with **metadata** archival
- Establish a CMMAP-ED **Wiki**, so that scientists, students, and educators can jointly edit
- Consider reorganizing to specifically **task (pay!) a scientist with developing content** to be implemented by outreach professionals
- Integration of **scientists with policy** institute?
- Lots of planning for **CGCC**
- Get outreach mat'ls to **other CMMAP institutions**
