

NSF Mock Panel Review

Decadal and Regional Climate Prediction using Earth System Models (EaSM)

Student Breakout Session
Wednesday, January 11, 2012

12th CMMAP Team Meeting

Goals of Mock Review

- Understand and become more familiar with the review panel process
- Identify strengths and weaknesses of proposals
- Come to a consensus on proposals

Reviewed Proposals

- Collaborative Studies of Anthropogenic Climate Change Using a Multi-Scale Modeling Framework
- Collaborative Research: CRI-EaSM Multiscale Modeling of Aerosol Indirect Effects on Decadal Timescales

Take aways...

- Nice to see the review process - written and panel reviews.
- Very valuable experience to see the solicitation and the responses to it.
- Makes the proposal process seem less daunting and scary.

Future Activities

- Have a session at next CMMAP winter meeting
- Student Summer Colloquium
 - workshop on cover letter writing
 - pedagogy
 - outreach activities
 - another review panel and discussion with program managers
